Arithmetic over function fields of curves

PROF. YURI TSCHINKEL

(Georg-August-Univ. Göttingen, NYU)

ABSTRACT: I will discuss problems concerning rational points and rational curves on algebraic varieties over nonclosed field, and recent developments arising from the theorem of Graber-Harris-Starr on the existence of sections of rationally connected fibrations over curves.

Date: Friday, 24.11.2006 at 14.15pm
